**SUBJECT: 1 Weird Diet Trick ELIMINATES Vitiligo**

Hi,

My good friend David was just 22 years old when his college roommate had noticed a big white splotch on his back.

“It looks like your skin coloring just faded away,” he said.

A few weeks later, a few more white splotches appeared on his legs and stomach, and in less than a month, they spread to other parts of David’s body, including his face.

Now he was beginning to panic, and people were beginning to notice.

His dermatologist said something that shocked him to the core:

“This isn’t something we can cure,” he said.

“Sometimes, it can be controlled, but in most cases, it gets worse and worse, until the entire body is affected.”

David left his office in tears.

...and that’s when something miraculous happened.

Seemingly out of nowhere, David stumbled onto this 1 unusual diet trick that completely eliminated his vitiligo and restored the natural color of his skin, without steroids, creams or excimer laser:
